TREESCAPES INTERNATIONAL™

www.treescapes.com

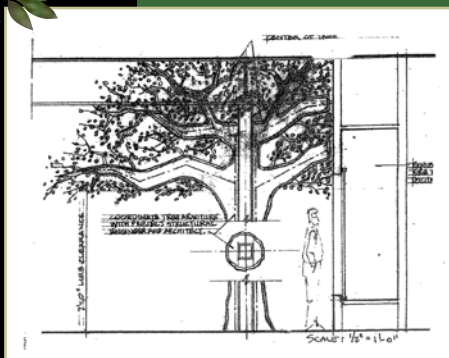

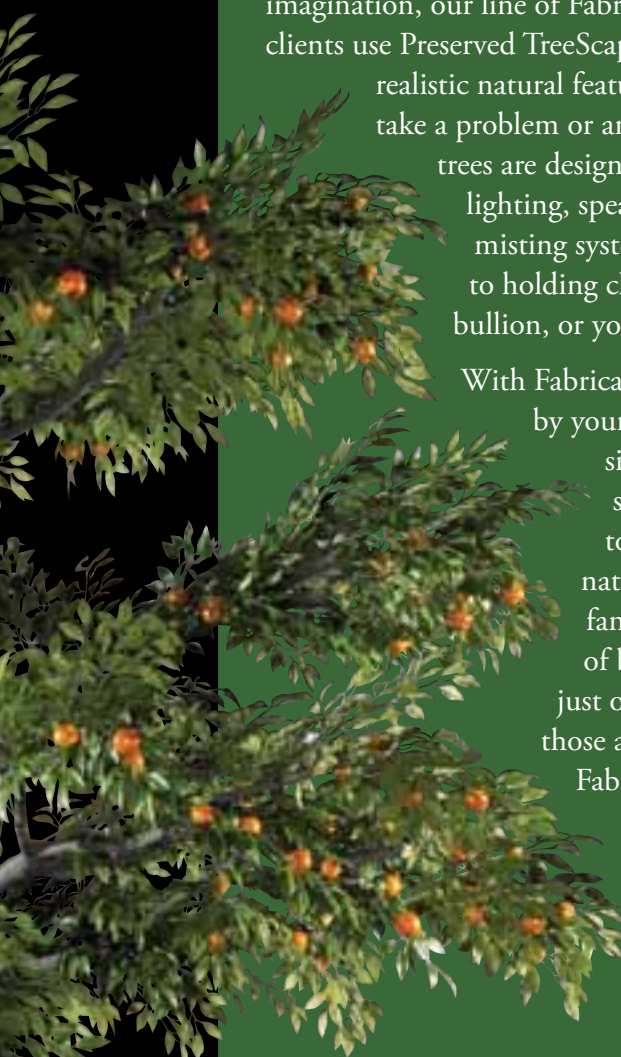

With Our Fabricated Products, Your Imagination is our Only Limitation.

When a design requires larger trees, whether botanically correct or created by your imagination, our line of Fabricated trees is perfect for meeting your specifications. Our clients use Preserved TreeScapes International's Fabricated trees to design beautifully realistic natural features to create their statement and specimen trees, while others take a problem or an idea, and then disguise it with our tree. Quite often our trees are designed with integrated usage which includes every thing from lighting, speakers, security cameras, monitors, misting systems, drain pipes and support columns, to holding children at play, secret cupboards, gold bullion, or your favorite beverage.

With Fabricated, the possibilities are limited only by your imagination, we can create a tree any size and diameter, whether incredibly small or dramatically oversized. Feel free to experiment, by blending traditional natural elements with whimsical fancy. Gone are the constraints of botanically correct trees that just occupy a space, don't get us those are GREAT, but one look Fabricated "Kid's Nest" tree on cover, created especially for Zone in New Mexico, will you, if you can dream Preserved TreeScapes can it.

How do you go about creating your tree?

We have built trees from blue prints, from miniature models, photographs, sketches on a note pad as well as just old fashioned desire, inspirational explanations and enthusiasm. Our team at Preserved TreeScapes will work with you to advise where needed and send progress photos during the manufacturing of your trees to ensure they take on the visual and architectural feel that you are trying to accomplish and the end result is award winning, as well as gratifying.

On the cover:

Kids Nest tree made with Sugar Maple bark, and a combination of Giant Banyan and Mountain Birch foliage.

"Blunt cut" green cane 25' with green weeping foliage. Cane diameters vary between 2 3/4" to 3 3/4"

Green Cane with oriental foliage

Cane only, no foliage

Black Bamboo

BARK OPTIONS

Preserved TreeScapes International has the ability to create as many different bark options as mother nature does, and then a few more. In order to maintain realism we take molds from live trees and replicate the bark to the exact texture, look and feel that nature creates. They can be custom colored to match the color of the trees in your region of the country, your design scheme, or just your own personal preference, if earth tones don't fit in, yes, we can make it lavender!

WEIGHTS:

Weights below are an approximate guideline. Weight will vary depending on species and specifications.

Pine, Oak, Maple, Ficus, Birch, Olive, Citrus, and Fruit trees:

- 10' OAH, 6'-8' diameter canopy with 3"- 5" diameter trunk - Approximately 170lbs.
- 12' OAH, 6'-8' diameter canopy with 3"- 5" diameter trunk - Approximately 205lbs.
- 16' OAH, 8'-10' diameter canopy with 6"- 8" diameter trunk - Approximately 410lbs.
- 20' OAH, 10'-12' diameter canopy with 6"- 8" diameter trunk - Approximately 509lbs.

Banyan trees:

- 12' OAH, 10 '-12' diameter canopy with 6"- 8" diameter trunk - Approximately 243lbs.
- 15' OAH, 15'-17' diameter canopy with 13"- 15" diameter trunk - Approximately 469lbs.
- 18' OAH, 18'-20' diameter canopy with 16"- 18" diameter trunk - Approximately 618lbs.

CONSTRUCTION:

All Fabricated trees start out with a Steel Core which makes up the basic shape and gives the tree a solid structure, this structure is then covered with a urethane foam which gives the tree the specified dimension. Artisans then hand sculpt the foam into the appropriate shape and form desired. The light weight, but durable foam helps to minimize the weight of the tree. The specified bark is then applied over the foam, bark has integral color to minimize marring but appropriate finish washes that help to enhance the appearance are applied in the final stages to give the tree character.

FOLIAGE:

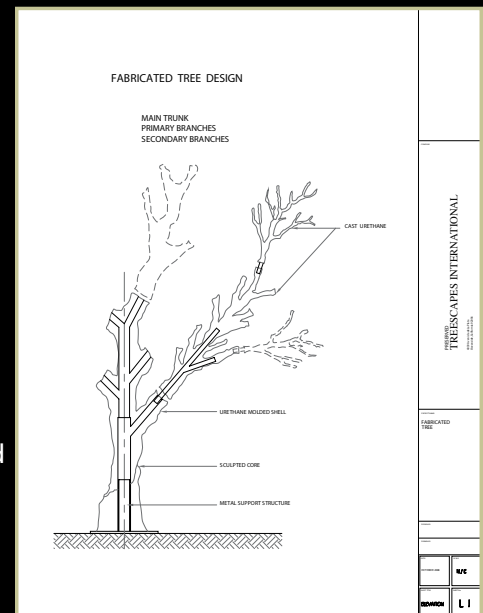

We manufacture and inventory an exclusive line of commercial grade foliage, that is inherently fire retardant to meet all fire codes. With IFR Foliage, the component required to make the leaf and stem fire retardant, is integrated during the manufacturing process. It cannot be washed off and will not wear off with time. We can create custom foliage for any species.

SHIPPING/INSTALLATION:

Fabricated Trees with an 8' diameter canopy or smaller are shipped in one piece and can just be bolted down, if on a base plate or set into a decorative planter. Trees with larger than 8' diameter canopy will require a Fabrication technician to install the tree and securely attach the branches and seam around the connections.
